

TANTRUM
S T R E E T

Tantrum Street Fact Sheet

Founded: 2011

Key Executives: **William Cervin**, CEO, founder
Kristin Barnes, Director, co-founder
David Butterfield, Director, co-founder
Kevin Craft, VP, co-founder
Carter Payne, Engineer, co-founder

Location: 2929 Canton Street
Dallas, Texas 75226 USA

Website: www.tantrumstreet.com

Description: Tantrum Street has built a modern, cloud-based data and payments platform that powers their mobile checkout apps (Cartwheel Register, Cartwheel Raise, and Cartwheel Campaign) and digital wallet (Skip Wallet) apps for small businesses, enterprises, developers, non-profits, political campaigns, and consumers. By combining smart-device imaging technologies with a secure, modern cloud backend, their developer-friendly platform provides complete freedom from traditional payment hardware, software, and accessories.

Tantrum Street is also a pioneering participant in Good Returns, a social enterprise network which facilitates impactful microloans to small businesses in the U.S. and abroad.

Products: **Cartwheel Register**—A free mobile app for small business owners that combines a next-generation store system and full-stack payments—all without a card swiper.

Cartwheel Raise – A free mobile app for non-profits that instantly enables each staff member, volunteer, and supporter to accept credit card donations on-the-spot.

Cartwheel Campaign - A free mobile app for political campaigns that instantly enables each staff member, volunteer, and supporter to accept credit card donations on-the-spot.

Skip Wallet—A free, cloud-based wallet that provides users with a personalized, swipe-free, cardless, and deviceless checkout and donation experience.

Handshake—Cloud-based middleware enabling mobile customer interactions and payments for use by governments and enterprises with existing POS infrastructure.

Kanizsa—Patent-pending software that uses a smartphone or tablet's camera to detect and read digits directly from a consumer's plastic credit card and securely send info to payment processors.
